Anthony Ndidi Mbagwu

Software Engineer | IT Support & Systems Optimization | Founder, Anchor
Abuja, Nigeria | ndidithegreat@gmail.com | linkedin.com/in/anthony-mbagwu

PROFESSIONAL SUMMARY

Software developer and founder of Anchor, an open-source Windows optimization app with 50+ downloads. Two years of hands-on IT support experience managing network security, workstations and critical infrastructure, plus internships in software engineering and cybersecurity. Skilled in system optimization, troubleshooting, network security and full-stack development with TypeScript, JavaScript, Python and SQL.

EXPERIENCE

Founder & Lead Developer | Anchor | Remote | August 2025 – Present

- Founded and built Anchor, an open-source Windows optimization app focused on transparent, reversible system tweaks
- Developed the application using TypeScript, JavaScript, HTML and CSS
- Grew the app to 50+ downloads, with an active public repository on GitHub
- Designed the full brand identity, including logo, icon set and wordmark

Software Engineer Intern | Digital Bridge Institute | Abuja, Nigeria | May 2026 – October 2026

- Developed and optimized SQL databases for internal projects
- Tested software applications and websites to identify and resolve defects before release
- Supported software reliability and database management across the engineering team

Cyber Security Analyst Intern | CodeAlpha | Remote | May 2026 – October 2026

- Performed threat detection and analysis on assigned systems
- Built a network packet tracing tool to capture and analyze network traffic
- Applied secure systems architecture principles in hands-on security projects

IT Support Engineer | C2NAO Global Concept | Abuja, Nigeria | 2023 – 2025

- Managed network security, including firewall rules, intrusion detection and VPN access controls
- Optimized computer systems and workflows, cutting operational costs by 20% within one year
- Trained staff on systems and processes, improving team productivity by 35% in six months
- Maintained critical IT infrastructure to keep company operations running without disruption
- Audited digital assets and configured new workstations for incoming staff

EDUCATION

B.Sc. Software Engineering | Miva Open University | Abuja, Nigeria | September 2024 – September 2027 (expected)

CERTIFICATIONS & TRAINING

- Google Cloud Skill Badge — Cloud Architecture, Google Cloud | 2025
- CCNA coursework: Cisco Packet Tracer — Cisco Networking Academy | 2026

SKILLS

- **Development:** TypeScript, JavaScript, Python, SQL, HTML, CSS, full-stack development, software testing, database management
- **IT & Infrastructure:** IT support, hardware support, troubleshooting, system diagnostics, system optimization, workstation configuration
- **Security:** Network security, firewall management, intrusion detection, VPN access control, threat detection
- **Tools:** Windows, Google Cloud, Cisco Packet Tracer, GitHub, Microsoft Office
- **Languages:** English (Native)
